

Amendment 1

Amendment 1 was adopted by the Transportation Policy Body (TPB) on October 4, 2011. This section outlines the purpose of Amendment 1; a summary of the changes; and references to changed section, appendices, pages, and exhibits that were amended through Amendment 1.

Purpose of Amendment 1

Starting in FFY 2013, WAMPO must program a portion of its annual federal allocation of Bridge Reconstruction and Rehabilitation (BR) funds on off-system bridge projects in the Transportation Improvement Program (TIP). The original Metropolitan Transportation Plan (MTP) 2035 did not include enough off-system bridges. Since projects must be in the MTP before they can be programmed in the TIP to get funding, WAMPO amended the MTP to include more off-system bridge projects.

Off-system bridges are those that are located on roadways that are classified as rural minor collectors and local roadways on the WAMPO Federal Roadway Functional Classification Map.

This BR funding was already taken into account when WAMPO developed revenue estimates for the original MTP 2035. Since this is not new funding, WAMPO removed and adjusted the costs of projects in the original MTP 2035 Eligible for Funding List.
